In a World Ideas

David Z idea 1: In a world where humans can only grow up to 3 feet tall, everything that humans have built would be 3 times smaller. This would mean that there would be more space in the world and all our buildings, tools, etc, would be a mini sized version of what we have right now.

David's Artifact: The Statue of Liberty but 3 x smaller than its original size.

Rachel's Artifact: Shorter doorways, doors,

David Z Idea 2: In a world where we have discovered teleportation but not to its full extent, there exists a portal pistol device that can only transport things that are 10x10, there would be faster service in food delivery and package delivery. It would cost a bit more, but you will get your item in seconds.

David's Artifact: A pistol device that looks like it came out of a comic book and it has a screen on top to determine where the item should teleport to.

David Z Idea 3: In a world where apples are purple inside, there exists purple apple pie, canned purple apples, etc.

David's Artifact: An apple cut in half with there being purple inside of it, or a purple apple pie.

Rachel's Artifact: Using the blue apples, can make dyed items like shirts.

Noor: In a world of technology humans are all virtual reality What if we live in a world with evolving technology, then now with AI we are slowly morphing into robots and questioning what is real and what is virtual. If we live in a virtual world, then our reality is programmed by an algorithm.

Noor's Artifact: a device that looks like a phone or glasses that serves as a portal between virtual reality and reality.

Rachel's Artifact: A technologically advanced mirror to see if your virtual or reality.

David's Artifact: A charging station that looks like a bus stop to charge either yourself or other electronics. All you have to do is stand there and you will charge.

Rachel: In a world where clouds can be solid enough to jump and sleep on, fluffy Possibility to build another city People can sleep on the clouds. Can jump, play around in the clouds. Airplanes need to be cautious, other animals like birds can chill there

Rachel's Artifact: shoe/boot that specialize in cloud jumping/terrain of clouds, walking on clouds, or pillows Weather machine to make sure there are enough clouds at any given time.

David's Artifact: The softest pillow in the world filled with clouds as its material.
